

<b>Academic Year: 2017/2018</b>		
<b>Course: : Technics and Tools for Urban and Territorial Planning</b>		
<b>Coordinator: Margarida Queirós</b>		
<b>Teaching Staff: José Manuel Reis Correia</b>		
<b>ECTS: 6</b>	<b>Weekly Hours: 4h</b>	<b>Typology: Theoretical/practical classes</b>
<b>Contents</b>		
<p>Urban planning procedure applied to a changing reality;  The urban planning;  Supporting structures: conceptual base, legal base, territorial and spatial base, the technical, scientific and political bases;  Supporting tools: the urban management; municipal spatial planning, urban parameters and indicators;  Basic procedures: initial approach; analysis and diagnosis; scenarios and proposals; the spatial plan.</p>		
<b>Objectives and skills</b>		
<p><b>Goals:</b>  Communicate in a coherent way the basic elements and regulation of the Portuguese urban spatial planning, which coexist in a dispersed form, establishing a common tool for critical reflection on what sustains and link the different figures of urban spatial planning in the Portuguese context.</p> <p>To experience the ability to add a methodology consistent with the aim of producing a focused urban analysis, using different urban planning instruments, an exercise that focuses on programming the community facilities network for an urban parish.</p> <p><b>Skills:</b>  Development of a basic language and a solid body of information on the contents of the spatial planning tools (Portuguese context). Establishing a link between this "heavy" instrumental urban planning, and a critical assessment of the urban planning practices, the urban complexity, and associated urban problems.</p>
